

MONTEL PROVIDES U.S. BEALE AIR FORCE BASE WITH INDUSTRIAL RACKING STORAGE SOLUTION

Client: U.S. Air Force

Location: Beale Air Force Base, CA, United States

Montel Authorized Dealer: BMH Equipment Inc.

Challenge: With a significant volume increase for its strategic and critical material stored to capacity, Beale Air Force Base was experiencing an outage of its storage space.

Objective: Rather than proceeding with the building of a new warehouse facility, Beale Air Force Base wanted to minimize construction costs while optimizing its warehouse storage space.

Solution: A state-of-the-art high-density storage system was proposed to Beale Air Force Base with 25-foot carriages for a maximized space utilization within its warehouse.

Product Description: With the assistance of its Local Authorized Dealer, BMH Equipment Inc., Montel provided the following custom designed industrial storage solution:

- Electrical Mobilex HD compact storage system with pallet racks on motorized carriages;
- Mobile storage racks designed for a load capacity performance of 30,000 pounds;
- Integrated built-in control panels to operate the system and display its status;
- Proximity detectors controlled electronically;
- 2 foot-level infrared safeties for each aisle;
- Flashing light and horn safety features that provide visual and audible warnings.
